South Sutter Water District	DWR	4,400	Reservoir Release	Transfer requested per long-term Agmt	DWR	Jul-Sep	N/A - Long Term Agmt
Total Under Long-Term Transfers		165,576					

Notes

¹ Maximum Quantity reflects the before conveyance losses including Delta carriage water losses which have preliminarily been estimated to range from 30% to 35%. Total does not include DWR/USBR Consolidated Place of Use (CPOU) quantity. The CPOU is unique and involves only exchanges of previously allocated CVP and SWP supply. There is no increase in SWP or CVP water diverted from the Delta or allocated to SWP and CVP contractors.

² Transfer Water for Crop Idling and Groundwater substitution transfers are developed and delivered based on the pattern of crop ET or capacity of the groundwater pumps unless storage is available; Reservoir Release transfers have more flexibility in delivery schedule depending on instream requirements
